

IS CLOUD-BASED POS RIGHT FOR YOUR BUSINESS?

75% OF RETAILERS PLAN TO HAVE A CLOUD-BASED POS PLATFORM WITHIN 3 YEARS

If one or more of these apply to you, you should explore cloud-based POS:

- ✓ We need to enhance our customer experience
- ✓ Our systems make it difficult to add new services
- ✓ We need enhanced POS technology capabilities
- ✓ Our ongoing expenses for hardware and software maintenance are too high
- ✓ Our IT team is small, and doesn't have time to research and implement a new POS system
- ✓ We spend too much time and money updating software in our stores

New advances in technologies, increased network bandwidth and improved redundancy solutions have made cloud-based POS a reality.

NOW IS THE TIME TO IMPROVE YOUR CUSTOMER EXPERIENCE AND REDUCE ONGOING SOFTWARE AND HARDWARE MAINTENANCE COST!

BRP CLOUD — WE MAKE CLOUD-BASED APPLICATIONS EASY!

We help retailers implement and maintain cloud-based applications. BRP Cloud, a separate business unit from BRP Consulting, combines the retail expertise of BRP consultants with the scale and networking expertise of Windstream Enterprise to help retailers efficiently implement and maintain cloud-based solutions.

Easy – With limited or no IT staff involvement from your team, it eliminates the need for you to employ and maintain a large IT organization.

Cost Effective – Eliminate large upfront expenditures, as cloud-based software is bundled with ongoing support and enhancements in the subscription fee.

This implementation model and billing structure make it easy to fund and get started quickly.

BRP Cloud Services

- **Subscriptions** – Reasonable monthly fees cover software, implementation and support.
- **Deployment Services** – We provide white glove rollout and training performed by certified local technicians.
- **Consulting Services** – We leverage BRP's industry leading consulting services for best practices, processes and integrations.
- **Network and Security** – Complete network and security services are included in the solution and an assessment of your network is available upon request.
- **Help Desk Support** – 24/7 U.S.-based support is available to help at any time.
